

RESET COMMERCIAL

Your clients form an opinion *before anyone says hello.*

Nobody compliments a clean office. They just trust it. We hold your space to a written standard on a schedule you never have to think about.

Reputation

The lobby is your first pitch

Smudged glass, a full bin, dust on the sill. Clients read those details as how you run everything else, and they read them in the first ten seconds, before you get a word in.

Your team

Nobody should be cleaning the break room

When cleaning falls to whoever notices, it lands on your most conscientious staff. That's an expensive way to buy a wiped counter, and it quietly wears people down.

Consistency

The same result every visit

Most cleaning services start strong and drift by month three. A written checklist signed off every visit is the only thing that stops it, and it's how we're built.

Scheduled to fit how your building actually runs

We build the schedule around your hours, not our route. Most clients land on after-hours service so their space is reset before anyone arrives.

AFTER HOURS · NIGHTLY

Daily Reset

For high-traffic spaces: clinics, salons, banks, and busy offices. We work after close so your team walks into a finished space every morning. Restrooms, break areas, floors, and touchpoints handled every visit.

WEEKLY OR BI-WEEKLY

Scheduled Reset

The rhythm most offices and storefronts settle into. Full checklist every visit, plus rotating detail work so the building never accumulates the buildup that forces an expensive reset later.

PERIODIC & PROJECT

Deep & Project Work

Quarterly deep cleans, tenant turnovers, seasonal resets, and post-construction handoffs. Quoted per project by square footage and condition, scheduled around your closing or opening date.

SPACES WE SERVICE

Professional offices · Clinics and dental practices · Salons and studios · Retail and storefronts · Banks and credit unions · Churches and community buildings · Real estate and insurance offices · Light industrial and shop offices · Rental and tenant turnovers

Licensed & insured

Background-checked technicians

Written checklist every visit

No long-term contract required

What a scheduled visit covers

Your checklist is built from your walkthrough, so the scope matches your building. This is the standard starting point.

Entry & common areas

Entry glass and door hardware, mats and thresholds, reception surfaces, seating, side tables, and magazine racks. Dust on sills, ledges, frames, and vents. Trash and recycling emptied and relined. Traffic paths vacuumed or mopped. Fingerprints off glass, switches, and handles.

Offices & workstations

Desks and open surfaces dusted around personal items, never through them. Chairs, bases, and legs. Monitors and keyboards dusted on request. Bins emptied. Interior glass and partitions spot-cleaned. Floors vacuumed including edges and under accessible furniture.

Conference & client-facing rooms

Tables polished, chairs wiped and reset to position, whiteboards cleaned on request. Glass walls and doors done streak-free. Credenzas, sills, and equipment surfaces dusted. Room left presentation-ready rather than merely tidy.

Restrooms

Toilets, urinals, and partitions cleaned and sanitized including hinges, bases, and surrounding floor. Sinks, counters, faucets, and mirrors polished. Dispensers restocked from your supply. Vents, trim, and baseboards dusted. Floors finished last and checked before we leave.

Break rooms & kitchens

Counters, backsplash, sinks, and faucets cleaned and polished. Appliance exteriors, including microwave interior. Cabinet fronts and handles. Tables and chairs. Trash and recycling emptied and relined. Floors mopped, corners and edges included.

Floors, touchpoints & closeout

Hard floors damp-mopped with a manufacturer-safe method, carpet vacuumed throughout. High-touch points disinfected: handles, switches, rails, and shared equipment. Supplies and trash removed, lights and doors set as instructed, checklist signed off before the visit closes.

How we work in your building

Keys and codes stay controlled

Access is issued to named technicians only, logged, and returned when someone leaves the team. We'll follow your alarm and lockup procedure exactly as written.

Trained, insured, background-checked

Every technician is trained on our standard before entering a client space, and we carry full coverage. Certificate of insurance available on request.

Documented, not assumed

Visits are logged against your checklist so you can see what was done and when. Nothing about your service depends on anyone's memory.

The same team, every visit

You aren't assigned whoever is free that night. Consistency is what makes a scheduled plan hold its standard past the first month.

One point of contact

You get a person, not a call center. Requests, schedule changes, and issues go to the same place and get answered the same business day.

If it isn't right, we fix it

Tell us within one business day and we return and correct it at no cost. The checklist shows us exactly where it fell short.

Quoted separately, so your invoice never surprises you

Carpet extraction and shampooing. Floor stripping, waxing, sealing, or refinishing. Exterior and high-access window cleaning or lift work. Pressure washing and exterior surfaces. Post-construction and renovation cleanup. Biohazard, mold, or hazardous-material remediation. Day-porter or on-site attendant coverage. Consumable supplies and paper goods unless we're stocking them for you. Emergency or same-day call-outs.

Let's walk your building

Fifteen minutes on site tells us more than any form. We'll build the checklist around your space, recommend the schedule it actually needs, and put the price in writing.
